

Project 2 11 Weeks	Natural Form <ul style="list-style-type: none"> • Primary & Secondary Research • Introduction in Ferrous/Non Ferrous /Alloys • Specification Content • Designing using Natural Form influences • Manufacture using sheet metal. • Use of CAD/CAM • Manufacture using Casting process & Enamelling • Evaluation Techniques Introduction 	Project 2 11 Weeks	Design Time <ul style="list-style-type: none"> • Focussed Research (Famous Designers) • Design Innovation • Sketching/Isometric/Orthographic/Exploded • Manufacture using range of materials and focus on properties of materials. • CAD/CAM (Laser Cutting/Vinyl Cutter) • Evaluation (Advanced) 	Project 3 2 nd Term Project 4	SolidWorks <ul style="list-style-type: none"> • CAD/CAM • Joining Methods • Working to Tolerances • Design Development CAD – Development in SolidWorks Drawing Techniques <ul style="list-style-type: none"> • Freehand skills including Isometric, Perspective. • Rendering • Annotation
				Project 5 3 rd Term	Games Project <ul style="list-style-type: none"> • Group Project relating design and manufacture with the theoretical content learned throughout the year.
				Theory for 3rd Form	<ul style="list-style-type: none"> • Students will learn about properties of materials. • Study into: Woods, Metals, Plastics, Textiles, Smart materials.

GCSE Design Technology

Project 1 11 Weeks	Fourth Form Theory Developing, Planning & Communicating Ideas <ul style="list-style-type: none"> • Brief & Specification Product Analysis Sustainability & Legislative Issues <ul style="list-style-type: none"> • Six 'R's' 	Fifth Form Theory Tools, Equipment & Manufacture <ul style="list-style-type: none"> • Accuracy & Precision • Correct choice of Tools Manufacture <ul style="list-style-type: none"> • Plan for Manufacture
---------------------------	--	---

	<ul style="list-style-type: none"> • BSI, CEN, ISO <p>Designers/Practitioners</p> <ul style="list-style-type: none"> • Research Jonathan Ive & Vernor Panton <p>Commercial Manufacturing Practises</p> <ul style="list-style-type: none"> • Types of Manufacture • Consumer Protection • Flat Pack Furniture • The Purpose of Packaging <p>Materials & Components</p> <ul style="list-style-type: none"> • Wood/Metal/Plastic/Card/Paper • Commercial Packaging Materials • Control Components • Micro & Nano Technology • Composites 	<ul style="list-style-type: none"> • 3D Modelling • <p>ICT & CAD/CAM</p> <ul style="list-style-type: none"> • Word Processing/Spreadsheets/ Presentations • Vector & Rastor <p>Systems & Processes</p> <ul style="list-style-type: none"> • Flow Diagrams • Microprocessors • CAM for increase accuracy and repeatability • Wasting/Reforming/Deforming/ Fabricating
	<p>Introduction into Eduqas Product Design Course Portfolio</p> <ul style="list-style-type: none"> • Analysis of the Task • Specification • Generation of Ideas • Development & Modelling • Final Solution – Graphical Presentation • Final Solution – Technical Details • Creative Thinking <p>Manufacture</p> <ul style="list-style-type: none"> • Plan for Manufacture • Manufacture, Difficulty, Quality, Accuracy, Finish • Evaluation • Modification 	<p>Final Project Portfolio</p> <ul style="list-style-type: none"> • Analysis of the Task • Specification • Generation of Ideas • Development & Modelling • Final Solution – Graphical Presentation • Final Solution – Technical Details • Creative Thinking <p>Manufacture</p> <ul style="list-style-type: none"> • Plan for Manufacture • Manufacture, Difficulty, Quality, Accuracy, Finish • Evaluation • Modification

A-level Product Design

	Sixth Form	Seventh Form
Component 1	<p>Theory</p> <p>Designing & Innovation</p> <ul style="list-style-type: none"> Principles Research Analysis of Problem Ergonomics Innovation Design Detail <p>Product Analysis</p> <ul style="list-style-type: none"> Production Method Form v Function Trends/Styles/Fashions <p>Materials & Components</p> <ul style="list-style-type: none"> Materials, Components & potential application Working Characteristics of materials Modern material Tech. Choosing Materials Components & Application <p>Industrial & Commercial Practices</p> <ul style="list-style-type: none"> Employment & Commercial Practises Manufacturing Systems Stages of Production Detailed Manufacture Methods Management Systems Safe Working Practises 	<p>Theory</p> <p>Human Responsibility</p> <ul style="list-style-type: none"> Customer & Legal Requirements Legislative Frameworks Risk Assessment Values Implicit in Product Design Forms of Energy Used. <p>Public Interaction – Marketing</p> <ul style="list-style-type: none"> Innovation in the Market Researching the Market Selling the Product Diffusion of Products Influences on Design <p>Processes</p> <ul style="list-style-type: none"> Hand Methods of Preparation, Processing & Manipulating Materials Machine Methods of Preparation, Processing & Manipulating Materials Combining Materials to Enhance Computer Aided Manufacture <p>Production Systems & Control</p> <ul style="list-style-type: none"> Use of Systems/Sub-Systems for Manufacture Management Control Systems Use of ICT in Industry
